About Me

I embarked on a journey fueled by my passion for programming. *Solving complex problems* and joy of finding solutions is my constant motivation. I stay at the forefront of technology, always eager to explore the latest frameworks and methodologies.

Work Experience

Freelancing : Upwork

June 2022 – Present

Worked with advanced web development technologies like ReactJS, NextJS, TypeScript, ECMAScript6, JavaScript, Tailwind CSS, Material UI, Bootstrap 5, CSS, HTML, and Git.

Technical Skills

Languages: C++, Java, Javascript, TypeScript, Python,

Technologies/Framework: NodeJs, NestJs, NextJs, OAuth, React, GraphQL Firebase, MongoDB, AWS, Flask, GatsbyJs

Cocurricular skills: Problem solving, Analytical skills, Communication skills, Teamwork, Leadership, Creativity

Courses: Computer Networks, Operating Systems, Database Management Systems, DataStructures And Algorithm

Education

Dharmsinh Desai University

June 2021 – Present

Bachelor of Technology in Information Technology

Projects

Project Catalog | NextJs, MongoDB, Mantine-UI, GA4, Google APIs | [Source Code](#) — [Web App Link](#)

- "Project Catalog" streamlines student collaboration by allowing users to upload project details, including an editable readme file, PDF, and video description. It fosters knowledge sharing and collaboration among peers by providing a centralized platform for viewing and accessing project information. Students can easily navigate through the catalog to explore and contribute to various projects, enhancing their learning experience. Admins can analyse project views using GA4.

Task Tracker | ReactJs, Spring Boot, Dracula-UI | [Source Code](#)

- "Task Tracker" simplifies task management by enabling users to effortlessly add and remove tasks. With its intuitive interface and advanced features(setting priorities to tasks , sends timely reminders via messages or emails), users can organize their to-do lists efficiently, keeping track of their progress effortlessly. The project offers a seamless experience for users to prioritize tasks and stay focused on their goals. "Task Tracker" enhances productivity by providing a flexible and user-friendly platform for managing daily tasks effectively.

Product Review Summarizer | NextJs, Next-Auth, Tailwind CSS , T5-Tokenizer | [Source Code](#)

- "The Product Review Summarizer project aims to simplify the process of understanding and analyzing product reviews on Amazon. Leveraging advanced natural language processing techniques, our system automatically summarizes lengthy product reviews, providing users with concise and informative insights.

Coding Profiles

- Solved over **300 problems** on [GeeksForGeeks](#) that are based on **Data Structures and Algorithms**.
- Attained the 30th rank in my institute by solving over 320+ problems and obtaining a total coding score of 920 on [GeeksForGeeks](#).
- Solved over **150 problems** on [Leetcode](#) with a reputation of 10.
- Participated in **18 contests** on codechef and have **solved 100+ DSA problems**.

Achievements

- Secured **2953th rank** in **Data Science GATE 2024**.
- Chegg Expert
- Gained a reputation score of 20 on stackoverflow
